

# Welcome

Welcome to Go and Cloud Native Leipzig #1.

2019-02-08, 19:00 CET, Basislager Leipzig

| [@golang\\_leipzig](#), [golangleipzig.space](#)

# Why

- idea floated around for some time
- there were some previous meetups and events around Go, e.g. [Ready to Go](#) (04/2018), [devopenspace 2018](#) (10/2018) and more

# Idea

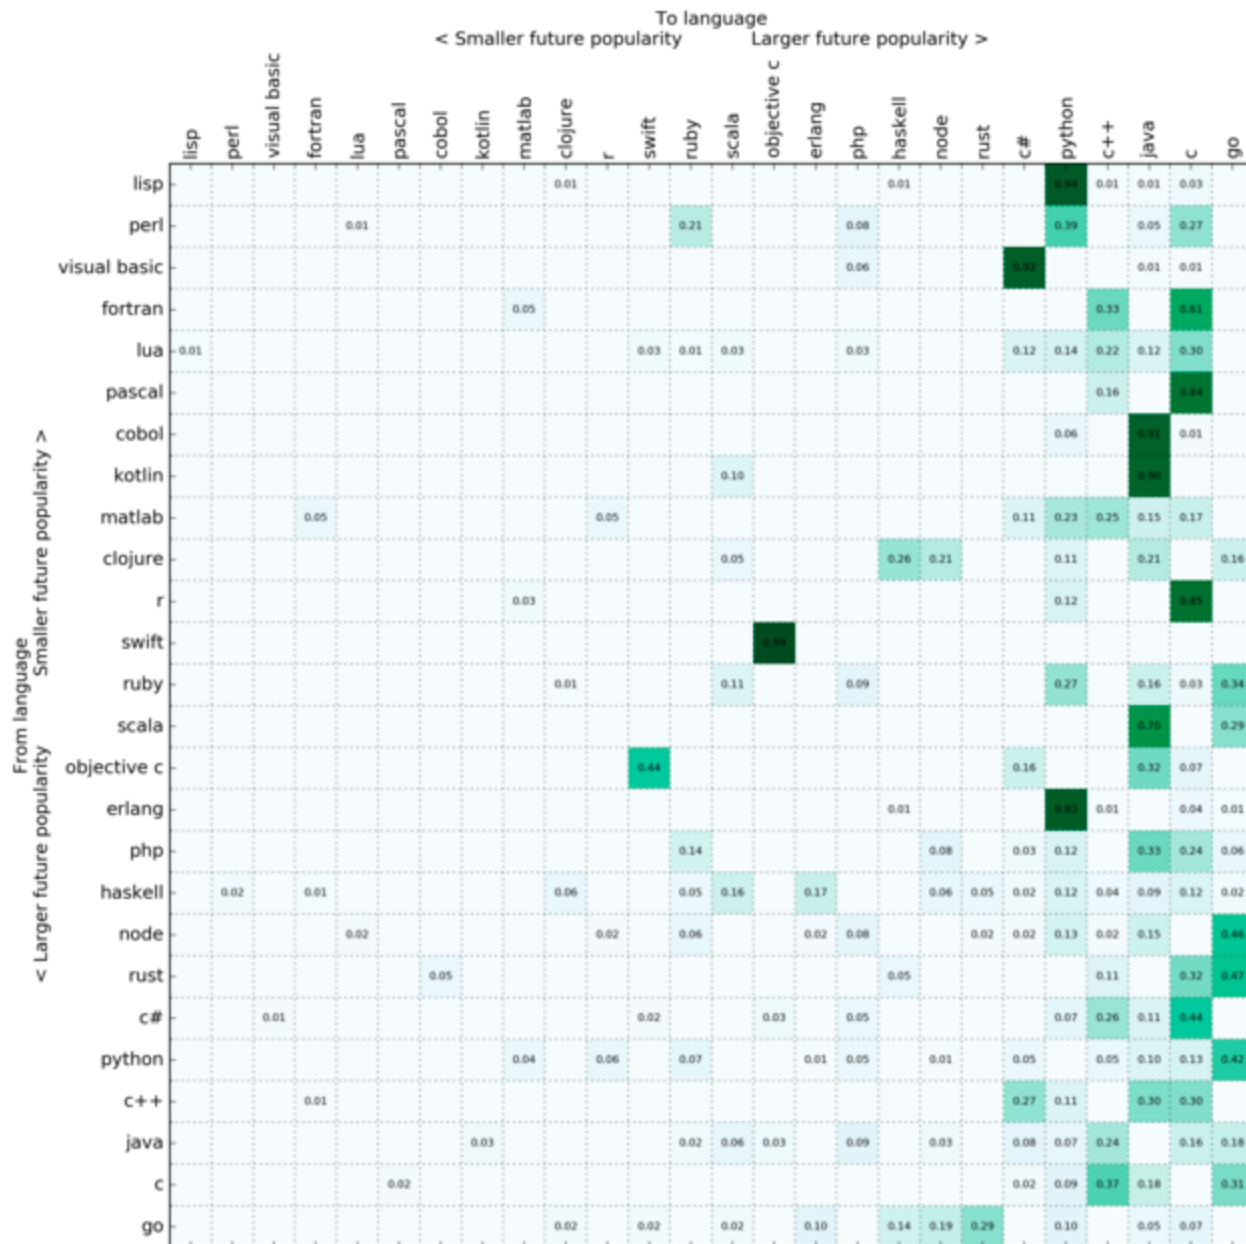

Join forces, combine Go and Cloud, just start and see where this goes.

# Go

- The eigenvector of "Why we moved from language X to language Y" (2017)

I took the stochastic matrix sorted by the future popularity of the language (as predicted by the first eigenvector).

# Go

# Go

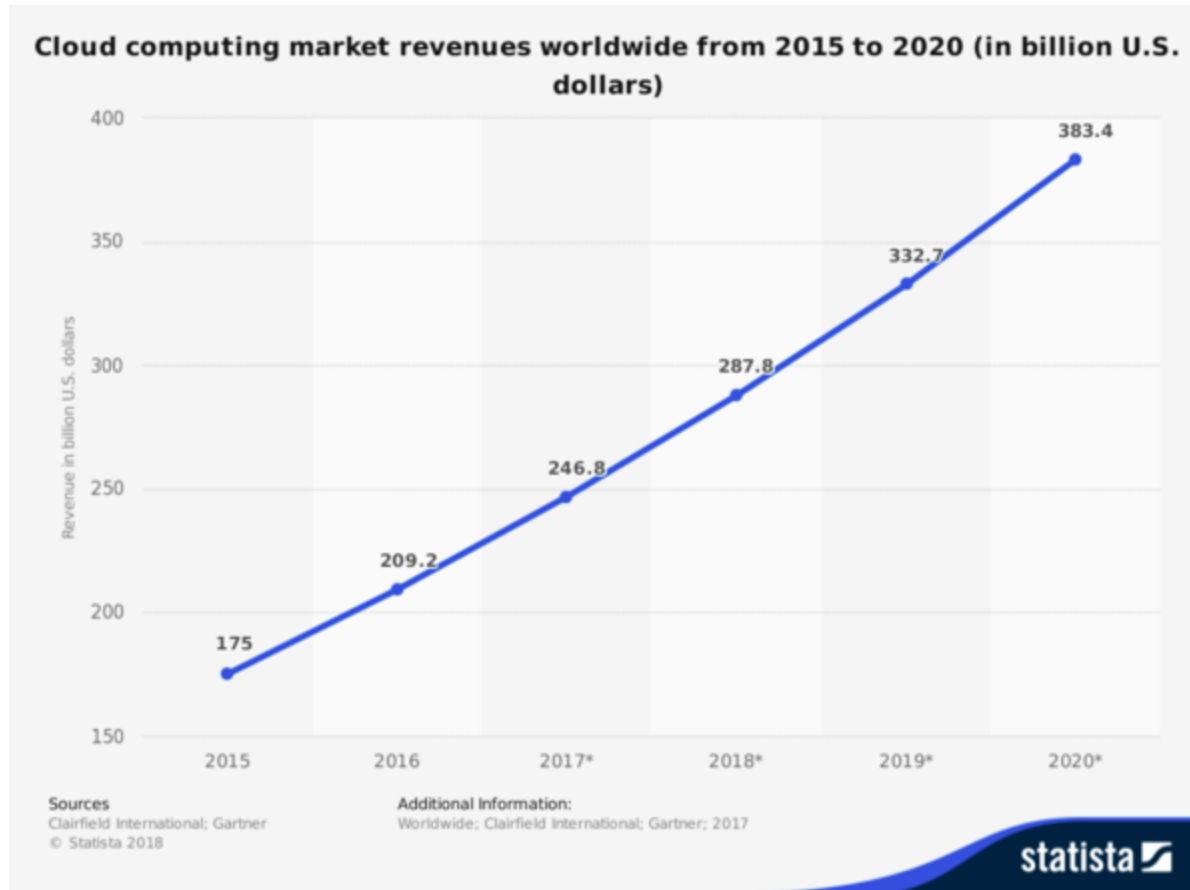

Surprisingly, (to me, at least) Go is the big winner here. There is a ton of search results for people moving from X to Go. I'm not even sure how I feel about it (I have mixed feelings about Go) but I guess my infallible analysis points to the inevitable conclusion that Go is something worth watching.

# Go meetups around the world

- <https://go-meetups.appspot.com/>, 235211 people, 11411 in Germany (2065 in Berlin, 23 in Aschaffenburg)
- 43 in Leipzig
- [gophercount](#)

# Cloud

The market.

From <https://www.statista.com/statistics/270811/cloud-computing-revenue-worldwide-since-2008/>.

# Cloud

The landscape:

- <https://landscape.cncf.io/>

# Wrap up

Our goal is to establish a place, where people from all backgrounds interested in the Go programming language and various cloud technologies can meet, learn, share experiences, present, discuss and network.

We aim to be a welcoming community, respecting Gopher values, as outlined here: <https://golang.org/conduct>

# Today

- past, present and future use of Go and Cloud
- ideas for presentations, workshops
- beer!
